(d) they present additional claims without canceling a correspond	onding number of t	inally rejected claim	s.
NOTE:			
3. Applicant's reply has overcome the following rejection(s):			
4. Newly proposed or amended claim(s) would be allowable canceling the non-allowable claim(s).	if submitted in a s	eparate, timely filed	amendment
5. ☑ The a) ☐ affidavit, b) ☐ exhibit, or c) ☑ request for reconsiderati application in condition for allowance because: See Continuation		idered but does NO	T place the
6. The affidavit or exhibit will NOT be considered because it is not a raised by the Examiner in the final rejection.	directed SOLELY	to issues which were	e newly
7. For purposes of Appeal, the proposed amendment(s) a) will n explanation of how the new or amended claims would be rejected			and an
The status of the claim(s) is (or will be) as follows:			
Claim(s) allowed: none.			
Claim(s) objected to: none.		•	
Claim(s) rejected: <u>1-6</u> .			
Claim(s) withdrawn from consideration: <u>none</u> .	•		
8. The drawing correction filed on is a) approved or b)	disapproved by	the Examiner.	
9. Note the attached Information Disclosure Statement(s)( PTO-14	49) Paper No(s).		
10. Other:		- A -	

Continuation of 5. does NOT place the application in condition for allowance because: Applicant's amendment filed on 11/04/2004 has been considered but they are not persuasive.

In the remarks, applicant argued (1) "Parmer does not disclose the real time displaying of data that was displayed on the first device and retrieved from a first storage medium via a communication link on a second device display device in real time with the displaying of the data on the first data display device".

(2) " the Parmer system waits a predetermined amount time before it transmits displayed data from a first device to a second device"

(3) "application point out that these claim terms are supported by the specification"

Examiner respectfully traversed applicant's remarks:

As to point (1), Palmer teaches after receiving the information from the client, the server sent the audio and graphic information to the client in order to replicate the shared region 18 for displaying in the client (col 3, In 15-19 and In 23-27). The shared region 18 is shared for displaying on the server and clients (col 4, In 12- 16 and In 18-21).

As to point (2), having system "waits a predetermined amount time before it transmits displayed data" or not having that system was not in the claim limitation. Palmer teaches the data is displayed on the server and that data can be displayed on the client (col 2, ln 25-27/col 3, ln 10-13/ col 4, ln 8-11).

(3) Araki teaches the passwork request, authentication the password( page 1-2).
